

Project Design Phase

Solution Architecture

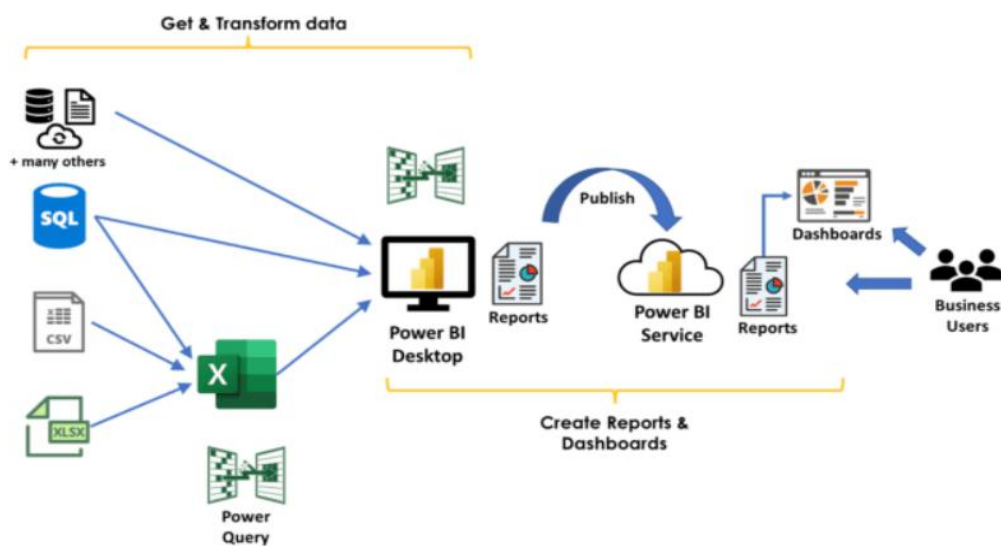

Date	21 March 2025
Team ID	PNT2025TMID06737
Project Name	Power BI Inflation Analysis Journeying Through Global Economic Terrain
Maximum Marks	4

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- ✓ Find the best tech solution to solve existing business problems.
- ✓ Describe the structure, characteristics, behavior, and other aspects of the Power BI solution to project stakeholders.
- ✓ Define features, development phases, and solution requirements.
- ✓ Provide specifications according to which the solution is defined, managed, and delivered.
